JAY VINCENT : THE CRAZY WORLD OF MEDICINE before purchasing it in order to gauge whether or not it would be worth my time, and all praised THE CRAZY WORLD OF MEDICINE:

Go ahead and laugh! Let the madness begin and then we'll see just how far it can go. This is what you've been waiting for, a lighter side, tickle your fancy, side splitting, bustin' out and roarin' with laughter Crazy World of Medicine. The world of medicine is so serious and healthcare professionals are knee deep and up to their elbows in stress and other conflicts that medical practice presents. With so much going on and so many demands there is little time to stop and take a breath, let alone laugh for a minute or two. Where did all the laughter go? Well, it's time for a change so take a minute and let the humorous side of medicine shine through. Here are 100 comic illustrations based on numerous areas

of medical practice from doctors and nurses to lab techs and even hospital housekeepers. And they're all here, a cast of characters whose only job it is to make you laugh. The cast includes Doctor Cyclops and his goofy cohort, Doctor Flogg. Nurse Schnozz wrestles with huge IV pumps while Nurse Flo, Nurse Pretty pants, and Nurse Maude face other challenges with impressive humor. Father Kerplockney does his job with wry wit while Doctor Knothead, the staff psychiatrist, counsels one laugh at a time. Once this cast gets together, you can count on this being a bona fide Crazy World of Medicine. Just think, if you take a look you might even feel better about your own job.
